Summary

Software Engineer with 1.5 years at Accenture building scalable, state-heavy interfaces in React, Next.js, and TypeScript. Looking to bring full-stack depth to a product-driven team.

Education

Graphic Era Deemed to be University

October 2020 – June 2024

Bachelor of Technology in Computer Science *CGPA: 8.94 / 10.0*

Dehradun, Uttarakhand

Experience

Associate Software engineer

October 2024 – April 2026

Accenture

Onsite

- Delivered 10+ controlled form components and UI features for an internal web portal using React.js and Next.js, reducing manual data entry errors and improving form submission reliability across teams.
- Integrated frontend dashboards with Node.js/Express REST APIs to surface real-time tabular data for internal users, validating all endpoints via Postman and cutting manual data reconciliation time for the ops team.
- Diagnosed and resolved 30+ complex state-management and cross-browser rendering bugs within two-week Agile sprint cycles, conducting code reviews and ensuring responsive design consistency across browsers.

Software Engineer Intern

January 2024 – May 2024

Tutcart

Remote

- Built and shipped core REST APIs and admin dashboards from scratch using Next.js as part of the founding engineering team, directly contributing to the product's initial release pipeline.
- Developed a map-based property/service search feature as a primary frontend contributor, enabling the platform's core discovery experience.
- Implemented Redux for global state management across the application, establishing scalable architecture patterns for the early-stage codebase.

Projects

SmartPrep - AI Interview Platform | [🔗 Live](#) | [GitHub](#) | *Next, Tailwind, Firebase, Vapi, Google AI SDK*

- Developed an AI-powered interview platform that automates candidate assessments, delivers real-time feedback, and streamlines the hiring process for recruiters and applicants.
- Integrated Google AI SDK and Vapi Agent to conduct automated interviews and generate real-time feedback reports with 90% accuracy in skill assessment.
- Reduced manual interview effort by 70% by automating candidate evaluation and feedback generation.

EnjinX - AI Search Engine | [GitHub](#) | *Next, Tailwind, FastAPI, SearXNG, Ollama, Supabase, Docker*

- Developed a full-stack AI search engine, integrating a Next.js/TypeScript frontend with a Python/FastAPI backend, Supabase for user auth/data, and a self-hosted SearXNG search instance via Docker.
- Designed and implemented the core AI processing pipeline, enabling structured analysis (sub-questions, synthesis, cited answers) of web search results using prompt engineering for both Gemini and local Mistral LLMs.
- Implemented comprehensive security features, including web content sanitization (HTML stripping), AI-driven refusal of inappropriate queries (via prompt engineering), and backend output moderation against disallowed content patterns.

Portfolio Website | [🔗 Live](#) | [GitHub](#) | *Next.js, Tailwind CSS, Framer Motion, EmailJS*

- Designed and developed a personal portfolio with project showcases, smooth animations, and a fully responsive layout optimized for all screen sizes.
- Achieved a perfect 100 Lighthouse performance score (90 Accessibility, 100 Best Practices, 100 SEO) through optimized asset loading, lazy rendering, and semantic HTML.
- Deployed on Vercel with automatic CI/CD via GitHub Actions.

Achievements | Hackathons

Solving for India Hackathon By GFG x Google and AMD 2023

- Qualified for Regionals among 1000 plus teams, Winners of Institute level
- Positioned among Top 10 of 140 teams in Regionals.

Coursera Employment Hackathon 2023

- Attained a position in the Top 20 among a vast pool of candidates in the Software Developer category
- Achieved a notable standing, placing in the Top 15 among thousands of individuals in the Data Analyst category

Technical Skills

Languages: C++, Java, Solidity, JavaScript, SQL, Typescript

Frameworks: React JS, Next JS, Express JS, Node JS, Tailwind CSS, REST, Redux

Databases: MongoDB, MySQL

Tools and Platforms: GCP, Git, GitHub, Vercel, Figma, VS Code, Docker
